	CD	Patent Litigation: Weatherford International, Inc. and Weatherford / Lamb, Inc., Plaintiffs, v. Casetech International, Inc., Defendant. Civil Action No. H-03-CV-05383, In the United States District Court For the Southern District of Texas, Houston Division. This litigation was brought by Weatherford under its U.S. Patent 5,575,333 (Lirette) against Casetech (Applicant). Counsel for Applicant was made aware of all of the art cited in this litigation as of the filing of the prior IDS on September 20, 2004, and made all such art of record in the IDS at that time, including, the '333 Lirette prior art patent made the subject of this litigation. It is Applicant's counsel's belief that none of the embodiments pending in the claims of this pending application are made the subject of an accusation of infringement of the '333 patent in this litigation. In view of the possibility that MPEP § 2001.06(c) could be interpreted as requiring the disclosure of this litigation, counsel for Applicant desires to err on the side of caution by providing the Examiner any information about this litigation that the Examiner may be interested in reviewing. Counsel for Applicant is advised that the litigation is now in the Markman phase, but that there has not yet been an order entered construing the claims of the '333 Lirette patent. Counsel for Applicant is not aware of any position being taken or assertion being made in this litigation by Casetech (Applicant) that would be contrary to or otherwise inconsistent with a position being taken or assertion being made in this application by Casetech (Applicant). The Examiner is invited to request any additional information that might be of interest or material to the Examiner's review of the pending claims.
